

Please do not weaken the No Call List impact for Wisconsin residents! Our phone used to ring off the hook with unwanted calls until we went on the no-call list. They were 98% nuisance calls and none of them would stop calling when we asked them to stop. We were even "slammed" by one company who changed our long distance carrier without our permission. Please do not weaken the WI no-call protection of our privacy--it is a model for other states' residents!
